Pravin Bokare

Senior Data Engineer | Databricks, Azure & AWS | Spark ETL & Kafka Streaming | Data Governance

Pune, India | +91 9823277578 | pravinbokare10@gmail.com | linkedin.com/in/pravin-bokare | leetcode.com/u/pravin-bokare

SUMMARY

Data Engineer with 3+ years building batch/streaming platforms on Databricks, Azure, and AWS (Python, SQL, PySpark). Built Kafka pipelines processing **360M+ events/day,** governed **100+** Unity Catalog datasets, and cut costs by **25%.** Databricks Certified Data Engineer Professional; hands-on with GenAI, RAG pipelines, Vector Search, and LLM agents.

EXPERIENCE

Senior Data Engineer Feb 2025 – Present
DataNimbus India Pvt. Ltd. *Hyderabad, India*

- Designed a Databricks medallion lakehouse with Gold-layer dimensional data models, ingesting **100+ GB/day** from 10+ financial sources via Auto Loader and DLT; applied Spark optimizations to improve BI dashboard performance by **60%.**
- Reduced Databricks costs by **25%** with no SLA impact: moved eligible data pipelines to serverless compute, used spot instances on classic clusters, and enabled predictive optimization on Unity Catalog managed tables.
- Orchestrated PySpark and Spark SQL ETL pipelines in Lakeflow Jobs pulling **1M+ records/day** from 15+ sources (REST APIs, PostgreSQL, MySQL); automated data quality testing (DLT expectations) to cut SLA violations by **50%.**
- Owned production pipeline architecture; handled client and stakeholder requests, wrote design docs and runbooks, led code reviews, set coding and data contract standards, and ran monitoring, alerting, and troubleshooting.
- Cut risk case report drafting from **3 hours to 20 minutes** by architecting an internal agentic AI accelerator, a Python LangGraph ReAct agent on Databricks-hosted Llama 3 70B with MLflow Tracing and Model Serving.
- Built a zero-egress retrieval-augmented generation (RAG) pipeline on Vector Search with GTE-large embeddings, gave the agent governed SQL tools via Unity Catalog functions, and used Claude Code for AI-assisted development.
- Implemented Unity Catalog governance for **100+** banking and payments datasets used by **10+** cross-functional teams: PII classification, row/column-level security, data lineage, secure coding, and security fixes for access control and secrets.
- Delivered a GenAI semantic search platform on Databricks Foundation Model APIs and Vector Search, embedding and indexing **10K+** unstructured documents and lowering manual tagging effort by **80%.**

Data Engineer (Systems Engineer) Oct 2023 – Feb 2025
Tata Consultancy Services Ltd. *Bengaluru, India*

- Engineered scalable event-driven pipelines in Python (PySpark) with Apache Kafka, Spark Structured Streaming, and Delta Lake on Databricks, processing **360M+ events/day** and shrinking data latency from hours to minutes.
- Developed reusable Azure Data Factory (ADF) ingestion and transformation frameworks for a program migrating **5+ PB** from on-premises SQL Server (T-SQL) to an ADLS Gen2 data lake, reducing engineering effort by **30%.**
- Tuned partitioning for analytical workloads, increasing query performance by **35%** and cutting pipeline runtime by **50%.**
- Loaded AWS S3 data into a Redshift data warehouse and wrote complex SQL (window functions, CTEs) for analytics.
- Automated Git-based Azure DevOps CI/CD releases; ran pipeline monitoring and alerting on an Agile (Scrum) team.

SKILLS

Programming	: Python (PySpark, Pandas), SQL (Spark SQL, T-SQL, PostgreSQL, MySQL)
Big Data	: Apache Spark, Spark Streaming, Apache Kafka, Delta Lake, Parquet, Spark Performance Tuning
Databricks	: Unity Catalog, Lakeflow Declarative Pipelines (DLT), Lakeflow Jobs, Auto Loader, AI/BI Dashboards
Cloud Platforms	: Azure Data Factory, ADLS Gen2, Azure Synapse, AWS S3, Redshift, Kinesis, Snowflake, GCP
Data Engineering	: ETL/ELT, Data Warehousing, Dimensional Data Modeling, Medallion Architecture, Data Contracts
Data Governance	: PII Classification, Row/Column-Level Security, Data Lineage, Data Quality, Audit Logging
GenAI & ML	: RAG, LLMs, Agentic AI, LangGraph, LangChain, Vector Search, Embeddings, OpenAI APIs, MLflow
DevOps & Tools	: Git, GitHub, Azure DevOps CI/CD, Power BI, Claude Code

CERTIFICATIONS

- **Databricks Certified Data Engineer Professional**
- **Databricks Certified Data Engineer Associate**
- **Microsoft Certified: Azure Data Engineer Associate (DP-203)**

EDUCATION

Walchand Institute of Technology | Solapur, India Aug 2019 – Jul 2023
Bachelor of Technology (B.Tech) ***CGPA: 9.45/10***
